

# Nelson Biagio Junior

Technology Program Director | SAP S/4HANA Transformation (Greenfield, Brownfield & Data Migration) | M&A Integration

São Paulo, Brazil · +55 11 91295-5481 · [nbiagiojunior@gmail.com](mailto:nbiagiojunior@gmail.com) · [linkedin.com/in/nelson-biagio-junior](https://www.linkedin.com/in/nelson-biagio-junior) · [github.com/nelson-biagiojr](https://github.com/nelson-biagiojr)

## EXECUTIVE PROFILE

**Most program directors bring delivery discipline. Few bring a Law degree alongside it.**

Over 33 years leading technology programs across Brazil, Latin America, the United States, and Europe, this profile sits at the intersection of three disciplines that rarely coexist in the same person: enterprise IT delivery, M&A execution, and regulatory law. That combination was forged through early career engagements at KPMG and PwC — where technology integration and post-transaction governance were the daily work — and sharpened across a 12-year IBM GBS career delivering programs for the Pentagon, NASA, the Bank of England, and the U.S. Department of Defense.

The practical result: able to lead a 225-person SAP delivery organization, manage TSA dependencies through a carve-out, and translate Brazil's Tax Reform (IBS/CBS) directly into SAP FI/SD configuration — without needing three separate workstreams to bridge those gaps.

Currently serving as Cutover and Transition Lead for AB InBev's Project Aurora, a \$6M+ global S/4HANA upgrade spanning 14 countries, 8 integrated enterprise systems, and multiple business units under zero-tolerance conditions for operational disruption. Operating model built for high-stakes, compressed timelines: integrated master planning, executive-grade risk escalation, war room leadership during go-live, and structured handoff to steady-state. Fluent in Portuguese, English, and Spanish — directly, without intermediaries, across cultures and time zones.

Experienced in both Greenfield and Brownfield SAP S/4HANA transformations, with hands-on leadership across full data migration lifecycles — from data strategy definition and object scoping through migration cycles, validation, and cutover execution in complex, multi-country environments.

## CORE CAPABILITIES

| Strategic Leadership                 | Delivery & Execution            | Technology & Domain                   |
|--------------------------------------|---------------------------------|---------------------------------------|
| – Program Orchestration & Governance | – Cutover & Go-Live Leadership  | – SAP ECC / S/4HANA                   |
| – M&A Integration & Separation       | – Hypercare & Stabilization     | – Data Migration Strategy & Execution |
| – Day 1 & Post-Close Readiness       | – Risk, Issue & Dependency Mgmt | – Greenfield & Brownfield SAP         |
| – TSA Management & Exit Planning     | – Integrated Master Planning    | – Cloud (Azure) & Integrations        |
| – Cross-Functional Alignment         | – Executive Communication       | – Vendor & SI Management              |
|                                      |                                 | – IMO / Enterprise PMO                |

## PROFESSIONAL HIGHLIGHTS

### M&A & Enterprise Transformation

- Full M&A lifecycle expertise spanning system integration, carve-outs, and technology separation — ensuring Day 1 readiness and business continuity under high-pressure conditions
- Consulting heritage in M&A environments (KPMG and PwC) with deep focus on process harmonization and post-transaction governance

- Expert in managing TSA (Transition Service Agreement) dependencies and coordinating clean exits between global entities

### Large-Scale SAP S/4HANA Programs

- Directed 225-person delivery organizations (including 11 project managers) across complex SAP ECC-to-S/4HANA migrations covering FI, CO, MM, SD, QM, PP, PM, SuccessFactors, EWM, and TM
- Global cutover lead for AB InBev's Project Aurora (S/4HANA upgrade) — managing zero-tolerance downtime windows, rollback strategies, and critical path sequencing across 14 countries
- SAP Activate methodology practitioner with proven governance frameworks (RAID logs, SteerCo) ensuring executive transparency and proactive risk mitigation

### Global Delivery & Mission-Critical Programs

- 12-year IBM GBS career delivering \$20M+ strategic programs for the Pentagon, NASA, Bank of England, and U.S. Department of Defense — operating at the highest governance and accountability standards
- Implemented PMO models across Latin America, Central America, and the Caribbean (IBM GBS), standardizing delivery governance across multiple countries with globally distributed teams
- Professional trilingualism (Portuguese, English, Spanish) enabling direct leadership of complex negotiations and technical deliveries across global teams

### Strategic Differentiator: IT, Compliance & Law

- Law degree applied to IT leadership — enabling superior command of complex regulatory programs such as Brazil's Tax Reform (IBS/CBS) and eSocial, translating legal requirements directly into system configurations
- Unique hybrid profile (IT + Legal + M&A) providing built-in operational insurance for enterprises navigating regulatory transitions — ensuring zero disruption across SAP SD, FI, and HR without sacrificing system performance

### SAP Transformation Experience

- Greenfield SAP implementations across multi-country environments with distinct regulatory and operational requirements
- Brownfield ECC-to-S/4HANA migrations with full lifecycle governance — from scoping through cutover and hypercare
- End-to-end Data Migration leadership: strategy definition, object scoping, migration cycles, validation, reconciliation, and cutover execution
- Integration of data migration workstreams with testing cycles (SIT, UAT) and go-live readiness across complex, multi-country environments

## PROFESSIONAL EXPERIENCE

---

### Amaris Consulting · São Paulo, Brazil

#### Technology Program Manager

*Oct 2024 – Present*

Embedded Program Manager across two consecutive strategic client engagements, leading high-complexity SAP and enterprise transformation programs for global organizations.

#### AB InBev — Project Aurora | Global S/4HANA Upgrade | Dec 2025 – Present

Cutover and Transition Lead for Project Aurora, AB InBev's global S/4HANA upgrade — a \$6M+ program spanning 14 countries, 8 integrated enterprise systems, and multiple business units under zero-tolerance conditions for operational disruption.

- Leads end-to-end cutover execution across 14 countries and 8 SAP environments, coordinating a direct team of 12 SAP consultants alongside Basis, ABAP, functional leads, data migration teams, and business stakeholders across multiple time zones
- Coordinates data migration streams as part of global cutover execution, ensuring data readiness, reconciliation, and validation across multiple SAP environments and integrated systems
- Manages critical path, downtime windows, rollback strategies, and cross-system sequencing dependencies at a scale where a single unresolved dependency can cascade across regions
- Leads war room operations during go-live execution: real-time issue triage, escalation management, and executive decision-making under sustained high-pressure conditions

- Delivers executive transparency through structured status reporting, risk dashboards, and SteerCo materials aligned with C-level expectations across a global organization

### **LDC (Louis Dreyfus Company) | SAP Tax & eSocial Programs | Oct 2024 – Dec 2025**

Led a portfolio of SAP regulatory programs — Brazil's Tax Reform (IBS/CBS) and eSocial — managing a cross-functional delivery organization of 84 people: 14 direct SAP consultants, 30 Accenture consultants, and 40+ key users across Finance, Legal, HR, and IT. All programs delivered within legal deadlines, with no regulatory exposure.

- Orchestrated multi-stream execution across SAP SD, FI, and HR modules, ensuring full alignment between regulatory requirements and system configurations ahead of hard government deadlines
- Managed 84-person cross-functional delivery organization spanning internal consultants, Accenture delivery leads, and business key users across multiple departments
- Achieved full regulatory compliance within statutory deadlines — zero incidents post go-live, zero regulatory exposure

### **Tiligence Consultoria · Brazil**

#### **Senior SAP Program Manager**

*Jun 2024 – Oct 2024*

Program Manager for Project 4US, CBMM's full ECC-to-S/4HANA migration — one of the most comprehensive SAP transformation programs in Brazil at the time, covering virtually the entire SAP application landscape.

- Led a full Brownfield ECC-to-S/4HANA migration, directing a 225-person delivery organization comprising 11 project managers and 214 Deloitte SAP consultants across FI, CO, MM, SD, QM, PP, PM, SuccessFactors, EWM, and TM
- Defined and governed the integrated program plan across all workstreams, ensuring 11 parallel project managers operated under a single, coherent execution model
- Established program governance framework covering RAID logs, executive status reporting, risk escalation cadence, and decision forums

### **Ontex Global · São Paulo, Brazil**

#### **IT Application Manager**

*Oct 2023 – May 2024*

- Managed SAP application portfolio across MM, SD, FI, CO, and WM, leading a team of 14 SAP consultants
- Directed AMS engagement with Seidor, reducing average ticket resolution time by 30% and achieving 15% cost reduction through vendor contract optimization

### **Stefanini Brasil · São Paulo, Brazil**

#### **Senior SAP Project Manager**

*Jan 2023 – Aug 2023*

- Delivered Brownfield ECC-to-S/4HANA migration for UHG/Amil within planned timeline across a high-complexity healthcare environment
- Managed AMS transition programs for Braskem and MRS Logística, coordinating teams of up to 64 SAP consultants
- Reduced Grupo Fleury's AMS operating costs by 16% through ServiceNow and SAP Solution Manager integration
- Led SAP ECC Greenfield implementation for Alliage across Dubai and Argentina operations simultaneously

### **NTT DATA · São Paulo, Brazil**

#### **Project Leader**

*Feb 2022 – Jan 2023*

- Led migration of Avangrid USA's 8 web portals from IBM WebSphere to Microsoft Azure — delivered on schedule with 8% cost savings, working on-site in Orange, CT for 4 months
- Coordinated global cross-functional teams in SAP supply chain transformation at Unilever across Brazil and international operations

### **Independent Consulting, Entrepreneurship & Academic Leadership · Brazil**

#### **Various Roles**

*2015 – 2022*

- Served as Portfolio Manager and PMO lead at Grupo Ser Educacional, managing budget control up to \$35M across web, mobile, data warehouse, and fintech projects

- Coordinated the MBA in Project Management program at UNINASSAU (Recife), teaching Risk Management and Financial Project Management
- Founded AgrolQ, an agritech startup focused on digital solutions for the Brazilian agricultural sector

### **Orange Business Services** · São Paulo, Brazil

#### **Senior Project Manager**

2013 – 2015

- Led global infrastructure and data center programs for Philip Morris International across multiple regions

### **IBM — Global Business Services (GBS)** · São Paulo, Brazil / Global

#### **Project Manager → Senior Project Manager → Project Executive I**

2001 – 2013

Twelve-year progression from Project Manager to Project Executive at IBM GBS, delivering \$20M+ programs for government, defense, financial, and industrial clients across North America, Europe, and Latin America.

- Pentagon (U.S. Department of Defense): Datacenter modernization and enterprise-wide deployment of IBM Tivoli for asset monitoring across defense infrastructure
- NASA: Implemented IBM Cognos and WebSphere platforms across multiple mission-critical use cases
- Bank of England: Deployed remote and virtual server infrastructure ensuring zero disruption to one of the world's most operationally sensitive financial institutions
- Global client portfolio: Programs for the U.S. Department of Justice, Bank of Canada, Boeing, Coca-Cola, and Qantas Airlines — consistently managing teams of 40+ professionals
- Promoted to Project Executive I — designed and implemented IBM GBS's PMO governance model across Central America, the Caribbean, and Latin America

### **PricewaterhouseCoopers (PwC)** · São Paulo, Brazil

#### **IT Consultant**

1997 – 2001

- Participated in M&A technology integration and process consolidation programs across client environments

### **KPMG** · São Paulo, Brazil

#### **Trainee → Consultant**

1994 – 1997

- Early exposure to system separation, process alignment, and post-transaction governance in M&A-related initiatives

## **EDUCATION**

---

**Bachelor's in Law** — Universidade Presbiteriana Mackenzie, São Paulo (1997–2001)

## **LANGUAGES**

---

Portuguese (Native) · English (Fluent / Bilingual) · Spanish (Native / Bilingual) · Italian (Professional) · French (Basic)
